

THE MEXICAN HEALTH AND AGING STUDY

(MHAS/ENASEM)

simpleMHAS/ENASEMsimple

Project Document
Version 2
January 2025

The MHAS (Mexican Health and Aging Study) is partly sponsored by the National Institutes of Health/National Institute on Aging (grant number NIH R01AG018016) in the United States and the Instituto Nacional de Estadística y Geografía (INEGI) in Mexico. Data files and documentation are public use and available at www.MHASweb.org.

I. Study Description

The Mexican Health and Aging Study (MHAS or ENASEM in Spanish) is a national longitudinal study of adults over the age of 50 with a broad socioeconomic perspective, with six waves completed in 2001, 2003, 2012, 2015, 2018, and 2021. The study protocols and survey instruments are highly comparable to the U.S. Health and Retirement Study (HRS). Households with at least one resident age 50 or older were eligible to be part of the MHAS baseline sample. If more than one person was age-eligible in the selected households, then one person was selected at random for the study. If the selected MHAS person was married or in a civil union, with the spouse residing in the same household, then the spouse or partner was also recruited to be part of the MHAS regardless of his/her age. Direct interviews were attempted for all participants, but proxy interviews were conducted whenever direct interviews were not possible. Starting in Wave 2 (2003), the study protocol included a next-of-kin interview regarding deceased participants.

For more information about the MHAS we recommend you read the cohort profile by Wong, Michaels-Obregón, and Palloni (2017) and the study website www.MHASweb.org (www.ENASEM.org for the Spanish-language website).

II. simpleMHAS (ENASEMsimple) Structure and Contents

The simpleMHAS (ENASEMsimple) is a longitudinal dataset that includes every person interviewed at least once for MHAS and a reduced selection of variables (approximately 65 excluding identifiers, information about the interview, and sampling weights) versus the full MHAS datasets. It includes a smaller selection of variables for ease of use by two groups in particular: students and researchers new to MHAS. We hope that educators will find this a useful tool to introduce students to analysis of large, longitudinal datasets.

a. Data file structure

The simpleMHAS data file is arranged in a long format, with every observation corresponding to an interview completed by or on behalf of a given individual for a given wave. Each unique participant appears once per wave in which they completed a direct interview or in which a proxy or next-of-kin interview was completed on their behalf. Thus, the total observations included in the data file corresponds to all 99,676 direct, proxy, and next-of-kin interviews completed in any wave (see Table 1 below).

Table 1. Mexican Health and Aging Study (MHAS) Sample Size Across Waves

	2001	2003	2012	2015	2018	2021	Total
Total Sample	15,186	14,250	18,465	15,988	18,249	17,538	99,676
Direct and Proxy Interviews	15,186	13,704	15,723	14,779	17,114	15,739	92,245
Direct Interviews, Follow-up	0	12,363	8,868	13,254	11,183	14,336	85,248
Direct Interviews, New sample	14,154	163	5,580	596	4,603	148	
Proxy Interviews, Follow-up	0	1,134	959	884	1,122	1,247	6,997
Proxy Interviews, New sample	1,032	44	316	45	206	8	
Next-of-Kin Interviews	-	546	2,742	1,209	1,135	1,799	7,431

Finally, the simpleMHAS data file in STATA include variable labels and value labels in both English and Spanish. It is important to note that this feature is only available when using STATA. To change the language of the labels in STATA, the user can use the following codes:

- To use the labels in Spanish

```
label language es
```

- To use the labels in English

```
label language en
```

For more information about `label language`, please refer to the STATA manual

(<https://www.stata.com/manuals/dlabellanguage.pdf>)

b. Contents

The variables in the table below are constant across waves within individual participants (identified by `cunicah` and `np`). Identifiers are thus kept constant to allow simpleMHAS to be merged with other MHAS data. The sampling weights (`factori_xx` and `factorh_xx`) are specific to each wave. In both this table and the one below it, the right-hand column lists from which MHAS dataset the variable was obtained; variables with the source “simpleMHAS” were newly created for simpleMHAS.

Variable Name	Variable Label (English)	Source of Variable
<code>cunicah</code>	Clave Unica del Hogar (=unhhid)	MHAS Master Follow-Up File 2021
<code>np</code>	Person Number/ Numero de Persona	MHAS Master Follow-Up File 2021
<code>codent01</code>	Person identification code 2001 (=ps3)	MHAS Master Follow-Up File 2021
<code>codent03</code>	Person identification code 2003 (=ent2)	MHAS Master Follow-Up File 2021
<code>acthog</code>	Update household code 2003	MHAS Master Follow-Up File 2021
<code>subhog_01</code>	2001 sub-household identifier	MHAS Master Follow-Up File 2021
<code>subhog_03</code>	2003 sub-household identifier	MHAS Master Follow-Up File 2021
<code>subhog_12</code>	2012 sub-household identifier	MHAS Master Follow-Up File 2021
<code>subhog_15</code>	2015 sub-household identifier	MHAS Master Follow-Up File 2021
<code>subhog_18</code>	2018 sub-household identifier	MHAS Master Follow-Up File 2021
<code>Subhog_21</code>	2021 sub-household identifier	MHAS Master Follow-Up File 2021
<code>factorh_01</code>	Household weight 2001	MHAS Master Follow-Up File 2021
<code>factori_01</code>	Individual weight 2001	MHAS Master Follow-Up File 2021
<code>factorh_03</code>	Household weight 2003	MHAS Master Follow-Up File 2021
<code>factori_03</code>	Individual weight 2003	MHAS Master Follow-Up File 2021

factorh_12	Household weight 2012	MHAS Master Follow-Up File 2021
factori_12	Individual weight 2012	MHAS Master Follow-Up File 2021
factorh_15	Household weight 2015	MHAS Master Follow-Up File 2021
factori_15	Individual weight 2015	MHAS Master Follow-Up File 2021
factorh_18	Household weight 2018	MHAS Master Follow-Up File 2021
factori_18	Individual weight 2018	MHAS Master Follow-Up File 2021
factorh_21	Household weight 2021	MHAS Master Follow-Up File 2021
factori_21	Individual weight 2021	MHAS Master Follow-Up File 2021
ron_pat	Pattern of participation in waves of MHAS	simpleMHAS
educacion	Years of education as of first interview	MHAS Created Variables
edu_gru	Years of education as of first interview (groups)	MHAS Created Variables

The variables in the table below can vary across waves. For example, a subject who participated in Waves 1 and 2 only would have two observations, each with a possibly different value of `tipent`, `urbano`, `diabetes` etc.

Variable Name	Variable Label (English)	Source of Variable
ronda	Wave of MHAS in which data were collected	simpleMHAS
tipent	Type of interview	MHAS Master Follow-Up File 2021
mes_ent	Month of interview	simpleMHAS
a_o_ent	Year of interview	simpleMHAS
fallecido	Interviewee had died since the last interview	Raw MHAS
sexo	Sex (1 = Male)	simpleMHAS
mes_nac	Month of birth	simpleMHAS
a_o_nac	Year of birth	simpleMHAS
edad	Age in full years	MHAS Created Variables
edad_gru	Age in full years (groups)	MHAS Created Variables
urbano	Locality size (urban or rural)	MHAS Created Variables
n_res	Number of residents in the household	Harmonized MHAS (2001–2018), simpleMHAS (2021)
n_suj_hog	Number of interviewed subjects in the household	simpleMHAS
par_ent	Spouse interview available	simpleMHAS
madre_viva	Mother is alive	simpleMHAS
padre_vivo	Father is alive	simpleMHAS
hermanos_vivos	Number of living siblings	simpleMHAS
n_hijos_vivos	Number of living children	simpleMHAS
hijos_vivos_gru	Number of living children (categorical)	simpleMHAS
nietos	Number of grandchildren	Harmonized MHAS
hijo_en_hog	1+ children of interviewee/spouse live in household	Harmonized MHAS (2001–2018), simpleMHAS (2021)
cuida_adulto	Use of time: Cares for sick or disabled adult	MHAS Created Variables
cuida_menor	Use of time: Cares for children under 12 years of age	MHAS Created Variables
voluntario	Use of time: Does volunteer work	MHAS Created Variables
asiste_cursos	Use of time: Attends training course, lecture, or class	MHAS Created Variables
asiste_club	Use of time: Attends sport or social club	MHAS Created Variables
lee	Use of time: Reads books, magazines, or periodicals	MHAS Created Variables
cruci_rompe	Use of time: Does crosswords, jigsaw puzzles, number games	MHAS Created Variables
juegos_mesa	Use of time: Plays tabletop games	MHAS Created Variables
comu_telef_comp	Use of time: Talks on telephone, sends messages on computer, or uses internet	MHAS Created Variables
act_mant	Use of time: Does household maintenance activities	MHAS Created Variables
ve_tv	Use of time: Watches television	MHAS Created Variables
cose	Use of time: Sews, embroiders, weaves, or does other handicrafts	MHAS Created Variables
compras	Use of time: Makes purchases	MHAS Created Variables
med_farm	Use of time: Visits doctor or pharmacies	MHAS Created Variables
salud_glob	Self-report of global health	MHAS Created Variables
hipertension	Doctor/medical personnel has told R that R has hypertension/high blood pressure	MHAS Created Variables
diabetes	Doctor/medical personnel has told R that R has diabetes	MHAS Created Variables
enf_pulm	Doctor/medical personnel has told R that R has respiratory illness	MHAS Created Variables

artritis	Doctor/medical personnel has told R that R has arthritis	MHAS Created Variables
infarto	Doctor/medical personnel has told R that R has had heart attack	MHAS Created Variables
embolia	Doctor/medical personnel has told R that R has had stroke	MHAS Created Variables
cancer	Doctor/medical personnel has told R that R has cancer	MHAS Created Variables
n_enf	Number of chronic illnesses	MHAS Created Variables
enf_cat	Number of chronic illnesses (categorical)	MHAS Created Variables
deprimido	During the past week: Has felt depressed	MHAS Created Variables
esfuerzo	During the past week: Has felt that everything they did was an effort	MHAS Created Variables
intranquilo	During the past week: Has felt that their sleep was restless	MHAS Created Variables
feliz	During the past week: Has felt happy	MHAS Created Variables
solo	During the past week: Has felt lonely	MHAS Created Variables
disf_vida	During the past week: Has felt that they enjoyed life	MHAS Created Variables
triste	During the past week: Has felt sad	MHAS Created Variables
cansado	During the past week: Has felt tired	MHAS Created Variables
energia	During the past week: Has felt that they had a lot of energy	MHAS Created Variables
n_sint_depr	Number of CES-D depressive symptoms (0–9)	MHAS Created Variables
cesd_deprimido	Has 5+ CES-D depressive symptoms	MHAS Created Variables
visita_medica	Last 12 months: Had visits to doctor (at least one)	MHAS Created Variables
hospitalizacion	Last 12 months: Was hospitalized (at least one night)	MHAS Created Variables
n_abvd_wh	Number of limitations with ADL's (Wallace & Herzog index)	simpleMHAS
n_abvd	Number of limitations with ADL's (0–5)	MHAS Created Variables
abvd_gru	Number of limitations with ADL's (categorical)	MHAS Created Variables
n_aivd	Number of limitations with IADL's (0–4)	MHAS Created Variables
aivd_gru	Number of limitations with IADL's (categorical)	MHAS Created Variables
n_mov	Number of limitations with mobility (0–4)	simpleMHAS
n_img	Number of limitations with large muscles index activities (0–4)	simpleMHAS
motoras_gruesas	Number of limitations with gross motor skills (0–4)	simpleMHAS
motoras_finas	Number of limitations with fine motor skills (0–4)	simpleMHAS
recuerdo1	Immediate verbal recall score	simpleMHAS
recuerdo2	Delayed verbal recall score	simpleMHAS
orientacion	Number of day, month, & year of interview that R remembered correctly	simpleMHAS
serial7	Serial subtraction score	MHAS Cognitive Function Measures (2018), simpleMHAS (2021)
memoria	Self-report or report by proxy of memory	MHAS Created Variables
bmi_imp	Mean of body mass index (kg/m ²) across 10 imputations	MHAS Height and Weight Imputations
imc_imp_cat	Body mass index (5 categories)	simpleMHAS
tabaco	Currently smokes tobacco	MHAS Created Variables
fumado	Has ever smoked tobacco	Harmonized MHAS (2001–2018), simpleMHAS (2021)
alcohol	Currently drinks alcoholic beverages	MHAS Created Variables
ejer_3_por_sem	Does exercise or heavy physical labor 3+ times per week	MHAS Created Variables
ocupacion	Current employment status	MHAS Created Variables
autoem	R is employed or self-employed, if they work	simpleMHAS
horas_trabajadas	Hours worked per week	simpleMHAS
imp_neto	Net worth of interviewee and spouse (if any)	MHAS Imputed Economic Variables

c. Codebook and Special Missing Values

Appendix 1 contains the “MHAS Created Variables” codebooks by wave. The created variables incorporate the use of special missing values to indicate the reason for the missing information. The primary reasons include interviews by proxy, refusals, and not valid values. It is important to note that special missing values are available for STATA and SAS users only but are NOT visible in SPSS.

The following is a list of special missing values used to explain missingness in the raw variables:

".p" Interview was complete by a proxy respondent (question not asked as part of proxy interviews)

".f" Subject is deceased at said wave and forward

".r" Subject refused to answer the question

".d" Subject answered “Don’t Know”

".s" Skipped question due to a previous answer or set of answers

".i" Incomplete interview, subject interrupted interview and did not continue

".m" Missing information, subject did not complete the question but did complete the rest of the interview

".x" Subject answered “Don’t Do”, this only applies for the ADLs and IADLs questions
